

Full-stack engineer with **6+ years** delivering Fin-Tech and enterprise SaaS products across **Java, Spring, and React** ecosystems. Specializes in backend micro-services architecture and analytics platforms, with end-to-end delivery ownership from requirements and client demos through to production.

SKILLS

- **Domains:** Financial Technology, Web3, Blockchain & Cryptography, Advertisement Technology
- **Languages:** Java, JavaScript, TypeScript, Python, SQL, Solidity, C++, Shell/Bash
- **Backend:** Spring Boot, Spring Batch, Spring Security, Hibernate, Reladomo, NodeJS, Django
- **Frontend:** ReactJS, NextJS, Redux, Single-SPA, TailwindCSS, Webpack
- **Databases:** PostgreSQL, MySQL, Sybase ASE, SQLite
- **Tools:** Git, CI/CD, Docker, Apache Kafka, QlikView, Autosys, Fitnesse, BPMN Workflow, Remix IDE
- **Platforms:** Linux, GCP, Ethereum, Hyperledger

EXPERIENCE

- **Mediaocean** Remote, India
Senior Software Engineer February 2026 – Present
 - Implemented bulk import functionality enabling users to create up to **100 campaigns and 10,000 media lines in a single operation**, using a Java ExecutorService to process records in parallel — dramatically reducing campaign setup time for large advertisers.
 - Enhanced a legacy core component within the Prisma Direct Integration pipeline serving **Disney**, improving the reliability and maintainability of a high-stakes, client-critical integration.
 - Own features end-to-end — from client demos and requirement analysis through estimation, development, and product Q&As — taking full delivery accountability on high-visibility projects.
- **QBurst Technologies** Noida, India
Senior Engineer December 2024 – February 2026
 - Architected and shipped Java Spring Web micro-services powering downstream integrations, improving data exchange reliability and reducing inter-service coupling across the platform.
 - Engineered a Spring Batch POC with a multi-database connection pool for high-volume data extraction, achieving substantial throughput gains that directly shaped the production architecture roadmap.
 - Designed end-to-end HLD and LLD system architecture for a travel booking recommendation SaaS platform pitched to a prospective client, translating business requirements into a scalable, cloud-ready technical blueprint.
 - Conducted an internal tech session on the Spring Security Framework — covering core concepts, authentication and authorization flows, and hands-on project bootstrapping — upskilling the engineering team on security best practices.
- **Infosys Ltd.** Remote, India
Senior Associate Consultant January 2024 – December 2024
 - Partnered with a Fortune 500 payment card provider to architect and deliver an analytics dashboard, enabling data-driven business insights across multiple client segments.
 - Engineered Java micro-services and a Single-SPA micro-frontend architecture, decoupling the UI into independently deployable modules and cutting release friction significantly.
 - Built a Robot Framework test suite covering critical dashboard user flows, reducing manual QA effort and strengthening regression confidence across releases.
 - Delivered ARIA/WCAG-compliant UI components, ensuring the dashboard met enterprise-grade web accessibility standards.
 - Conducted technical interviews for engineering candidates, contributing directly to team hiring decisions.
- **Infosys Ltd.** Bengaluru, India
Technology Analyst August 2022 – December 2023

- Designed and maintained RESTful APIs serving as the integration backbone between multiple internal systems, standardizing data contracts and reducing coupling.
- Optimised the SQL pipeline loading Mutual Fund analytics into QlikView, **cutting report generation time from 12 minutes to under 8** — a ~40% improvement in analyst wait time.
- Supported the annual after-tax processing cycle end-to-end, optimizing multiple SQL queries to ensure timely and accurate after-tax report delivery to clients.
- Built QlikView dashboards translating complex operational data into actionable insights for business stakeholders.
- Mentored junior developers through code reviews and technical guidance, accelerating their onboarding and raising overall code quality.
- Designed and led knowledge-transfer sessions to onboard team members, ensuring full continuity across project handovers.

Infosys Ltd.

Bengaluru, India

System Engineer

August 2019 – July 2022

- Built Fin-Tech software for a global investment banking client using Java Spring, ReactJS, and Sybase ASE, contributing to core trading and reporting workflows used by hundreds of users daily.
- Proactively identified a workflow bottleneck in the client's review process and independently designed a targeted UI solution, **recovering ~1 hour of productivity per user per day**.
- Identified and resolved a critical API bottleneck in the GP Valuations analytics pipeline, **reducing QlikView report load time from ~60 minutes to 10–15 minutes** — an ~85% reduction that directly improved analyst productivity.

PROJECTS

- **TaskIt | Java, Spring Boot, Spring Security, JWT**: Built a production-ready multi-tenant task management API with role-based access control (RBAC), enabling secure data isolation across organizations. Implemented JWT-based stateless authentication, eliminating session overhead and enabling horizontal scalability.
- **MSIT.in | Python, Django**: Led a team to build and launch the official MSIT college website serving thousands of students and faculty. Engineered a custom Django CMS and admin portal with rich front-end interactions, eliminating reliance on third-party CMS tooling and cutting content update turnaround time significantly.
- **ABToast | Python, Django | Open Source (6+ GitHub Stars)**: Designed and open-sourced a modular A/B testing library for Django, using session middleware to run stateless page-variant experiments with zero additional dependencies — enabling seamless drop-in adoption in any existing Django project.

EDUCATION

- **Guru Gobind Singh Indraprastha University** New Delhi, India
B.Tech, Computer Science & Engineering July 2015 – June 2019
GPA: 8.66 / 10.0
- **Kendriya Vidyalaya Janakpuri** New Delhi, India
Senior Secondary (Class XII) March 2014
Percentage: 94.4%

CERTIFICATIONS

- Professional Cloud Developer Certification — **Google Cloud** (December 2025)
