

Senior software engineer with **7 years** building **Java** and **Spring Boot** micro-services for Fin-Tech, Ad-Tech, and enterprise SaaS platforms. Strong in backend architecture, concurrent batch processing, and SQL/API performance tuning, with **critical pipeline runtimes cut by 40–85%**.

SKILLS

- **Java & Spring:** Java 17, Spring Boot, Spring Batch, Spring Security, Spring MVC, Hibernate/JPA, Reladomo
- **Architecture:** Micro-services, REST API design, Multithreading & Concurrency, Apache Kafka, HLD/LLD system design, BPMN Workflow, Micro-frontends (Single-SPA)
- **Data:** PostgreSQL, MySQL, Sybase ASE, SQL performance tuning, Connection pooling, QlikView
- **Platform & Tools:** Linux, GCP, Docker, Git, CI/CD, Autosys, Fitnesse, Robot Framework
- **Also:** JavaScript, TypeScript, ReactJS, NextJS, Redux, Python/Django, Solidity/Ethereum

EXPERIENCE

- **Mediaocean** Remote, India
Senior Software Engineer February 2026 – Present
 - Built bulk-import processing on a Java **ExecutorService** thread pool, letting advertisers create **100 campaigns and 10,000 media lines in a single operation** and collapsing setup time for large accounts.
 - Modernised a legacy core component in the Prisma Direct integration pipeline serving **Disney**; own features end-to-end from client demos and estimation through delivery and product Q&A.
- **QBurst Technologies** Noida, India
Senior Engineer December 2024 – February 2026
 - Authored HLD/LLD for a travel-booking recommendation SaaS platform pitched to a prospective client, and led an internal Spring Security deep-dive on authentication and authorisation flows.
- **Infosys Ltd.** Bengaluru & Remote, India
Senior Associate Consultant → Technology Analyst → System Engineer August 2019 – December 2024
 - Delivered an analytics dashboard for a **Fortune 500** payment card provider on Java micro-services with a Single-SPA micro-frontend, decoupling the UI into independently deployable modules.
 - Diagnosed and resolved an API bottleneck in the GP Valuations analytics pipeline, **cutting report load time from ~60 minutes to 10–15** — an ~85% reduction.
 - Tuned the SQL pipeline behind Mutual Fund analytics — **12 minutes to under 8 (~40%)** — and optimised queries across the annual after-tax processing cycle.
 - Built Fin-Tech trading and reporting workflows for a global investment bank (Java Spring, ReactJS, Sybase ASE); self-initiated a fix to a review bottleneck that **recovered ~1 hour per user per day**.
 - Mentored junior developers through code reviews, led knowledge-transfer sessions for project handovers, and interviewed engineering candidates.

PROJECTS

- **TaskIt** | **Java, Spring Boot, Spring Security, JWT**: Multi-tenant task API with role-based access control (RBAC) for per-organisation data isolation, and stateless JWT authentication enabling horizontal scaling.
- **ABToast** | **Python, Django** | **Open Source**: Modular A/B testing library running stateless page-variant experiments via session middleware, with zero added dependencies for drop-in use in any Django project.

EDUCATION & CERTIFICATIONS

- **Guru Gobind Singh Indraprastha University** New Delhi, India
B.Tech, Computer Science & Engineering GPA: 8.66 / 10.0 July 2015 – June 2019
- **Professional Cloud Developer: Google Cloud** (December 2025)
